

# GREETING TO DR. PHIL CALDWELL

How are you ? I hope you are well. I'm so very excited to describe my current situation and thank you for sponsoring my educatio.

My name is Chea Menghuy, I am 24 years old this year. I have three siblings, I am the third child in the family. I am currently studying at Health Sciences Institute of RCAF. I have been attending school for one week in the second semester of the year four.

My studies now are not much of a problem, I just do not have as much time as before because this year I have internship with school at the hospital in Phnom Penh, I had to start internship at 8 am and finish at 12 noon, and I had to get ready for prepare to school at 1-5pm. But fortunately, now that I am staying at rent room with my brother near the hospital where I do internship, I do not have to pay for room and the things I need to use because my brother pays for it. In the free time, I volunteered as a doctor to treatment the elderly and children in provinces and without pay. However I always try my best and take the next step.

As for my family situation, it is not so good now because my parents very old and received a low salary of only 50\$ person. They help me to buy food and sometimes buy medical supplies for my studies. All of the above is my situation and my family now.

When all was said and done, I will do my best for my education and my family plus everyone. Finally, I would like to thank you The Savong Foundation for sponsoring my education, wish the donors good luck, success in all their endeavors, and god bless you. I am grateful to you all, you're a lifesaver. 🙏
